

Driving a just transition toward low carbon cities

Everyone has the right to ecological space and the duty of not constraining that of others; to live and help live, work and play in climate-resilient and sustainable cities and beyond.

INNOVATIVE DIMENSIONS

JUSTNature will simultaneously drive Innovation in 4 dimensions considered key to achieving the overall aim of low carbon cities:

Enabling
governance
capabilities

Long-term
NbS system
maintenance
& operation

Enabling
business
models and
market design

Technology &
applications

OUR VISION

JUSTNature selects six City Practice Labs that are situated across different contexts within Europe.

OUR TEAM

- Consortium Partner
- City Partner

The JUSTNature project consortium consists of 20 partners who are working together with their teams on achieving the project's objectives. The team consists of a network of seven city partners and a wide range of partner organizations ranging across the fields of research, technology, stakeholder, and community engagement.
